Skills

Front End: HTML, CSS, Sass, JavaScript, jQuery, React, Redux, Chrome Extensions, Packages (lodash, moment.js, etc.)

Back End: Node.js

Design: Illustrator, Photoshop, Premiere Pro

Employment

Kellogg School of Management

Course Logistics Specialist (Contract) · Dec. 2017 to June 2018 · Evanston, Illinois

Dev Environment: HTML, CSS, JavaScript, jQuery, Chrome Extension

- Built a Chrome extension for Canvas, a learning management system, to save time on various projects such as creating and sorting student groups
- Developed web apps for creating seating charts and student information cards to improve efficiency on those tasks across several departments
- Provided administrative support to professors across two campuses

Harris School Solutions

Web Software Developer Apprentice · Apr. 2017 to June 2017 · Remote

Dev Environment: JavaScript, Packages (lodash, moment.js, ajv), Mocha, Chai, npm

- Contributed to software by adding validation and transformation functionality for inputted user files
- Built unit testing to ensure code worked properly and that clients were shown understandable errors when issues with their files arose
- Created mapping files using a JSON Schema to validate inputted files
- Developed and tested software iteratively using Agile methodology to ensure user story requirements were met

Education

General Assembly

Web Development Immersive 2016

USC School of Cinematic Arts

BA Cinema-Television 2011

Portfolio Sample (jamiebb.com)

eStore
